

TANGO EXTEND

AT-A-GLANCE

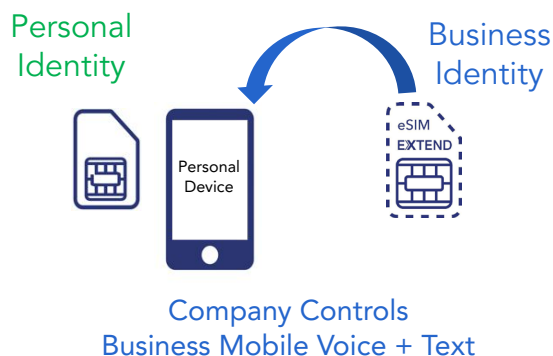

Now it's easy to add a business extension SIM to any mobile phone, including BYOD and corporate liable phones.

Deploy intuitive Mobile UC for today's Work-from-Anywhere business world.

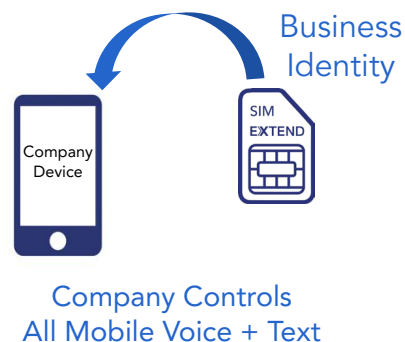

- » Gives the business direct control over a second line on an employee's phone for business voice, messaging and data.
- » All business communications use the existing UC platform and business number.
- » Personal communications on a BYOD phone remain private and secure.
- » Simple to use: requires no special apps, phone clients or training.
- » Supports eSIM and physical SIMs.
- » Enables the native phone interface for business-class calls using the best quality network available.
- » Supports calling features : Conference, Hold and other business functions are easy and intuitive.
- » Permits automatic capturing, recording or monitoring of business calls and texts.
- » Available anywhere in minutes with QR code activation for eSIM provisioning.

TANGO EXTEND The Business SIM for BYOD

TANGO EXTEND The Business SIM for Company Phones

100% Native: No Apps
eSIM or Physical SIM
Control & Record Business Communications

Hybrid and Work-from-Anywhere Communications Solution

- » Allow employees to use the mobile phones they like and are familiar with.
- » Retire expensive landline desk phones and company-issued mobile phones.
- » Cut your company's carbon footprint by eliminating redundant hardware.
- » Prevent employees from making business calls with personal numbers.
- » Retain business contacts when employees leave your employ.
- » Reduce administrative overhead by cutting personal phone expensing.
- » End supporting on-phone UC apps and enforcing usage policies.
